Trans. of Ukrayins'kyi Biokhimichnyi Zhurnal (USSR)

DESCRIPTORS: *Trypsin, *Drugs, Pharmacology,
Inhibition, *Blood plasma, *Enzymes, Decomposition,
Proteins, Fever, Therapy.

The present article supports the conception that the
binding of trypsin by the inhibitors in the plasma is
reversible and that this complex tends to dissociate.
The antifebrile action of trypsin is based on the decom-
position of certain proteins or peptides, which have a
strong affinity for the enzyme.
